Prior to entering the port all ship agents of all cargo ships calling at the ports shall provide the port authorities with accurate information on the composition of the ship's crew and the health status of all crew members. The crew of foreign-flagged vessels calling at the Latvian ports shall be prohibited from coming ashore, except the specific cases to be agreed upon when necessary for the normal operation of the ship. Crew change in Latvia is not prohibited if the transportation of the seafarer from Latvia can be arranged. It should be noted that in practice disembarkation of Covid-19 infected crewmembers from a ship to a special hotel is very complicated due to absence of special rules for transportation of such patients and reluctance of private carriers to accept Covid-19 positive passengers. Surveyors' attendance can be arranged without complications.

3. Inland transports' situation (max. 10 lines)

Since 26 of February 2021 a person is allowed to travel to Latvia only in case of urgent necessity due to work, for receiving of medical services, for transit, and in other cases specified by Cabinet Rules No.655 (clause 5.49.1.1). It is compulsory for all persons, who are planning to cross Latvian border, to complete an electronic form at the web portal <https://www.covidpass.lv/en/> before crossing the border. Entering Latvia all persons aged 12 and older are required to have a document confirming a negative COVID-19 test made at least 72 hours prior to boarding the carrier's transport. This requirement shall not apply to seafarers who must reach their work place aboard a ship or must return from it, and in other situations specified in point 35.4 of Cabinet Regulation No 360. After arriving from a country with a high incidence of COVID-19 (more than 50 cases per 100,000 inhabitants) a ten-day self-isolation is compulsory, except if the person has recovered from Covid-19, has antibodies, and this fact is confirmed by a medical statement.

All travelers, including US citizens and residents, must show proof of a negative Covid19 test within 72 hours of starting their travel or provide proof they have recovered from Covid19. Foreign travelers who have been in China, Iran, Schengen area countries, the UK, Ireland, Brazil or South Africa within prior 14 days are not permitted to enter the US (with some exceptions). Info here: <https://www.cdc.gov/coronavirus/2019-ncov/travelers/from-other-countries.html>. South Africa was added to this list. In a few instances, a negative Covid19 test within 72 hours was required. Our surveyors follow all required protocols and maintain physical distance best possible. Our surveyors are traveling by air again. We continue to offer the option of 'virtual surveys' using video technology whereby one of our professional surveyors will direct staff at a location remotely while filming and photographing – we have had a very few instances of facilities with no access except for their own employees. No changes.

The Australian government has banned the export of some equipment that could help efforts to stop the spread of COVID-19, including: disposable face masks, disposable gloves, disposable gowns, goggles, glasses or eye visors, alcohol wipes, hand sanitizer.

All commercial vessels must now use the Maritime Arrivals Reporting System (MARS) for all vessel pre-arrival reporting.

All vessels entering Australia that have a suspected case of COVID-19 on board will not be allowed to unload goods or disembark travellers until cleared to do so by the human biosecurity officer.

Where vessels have a suspected case of COVID-19 on board, a human biosecurity officer will screen for COVID-19, determine the appropriate course of action and issue directions.
